

Executive Summary: FY 2024 Performance

The dashboard provides a comprehensive look at the company's financial health, sales distribution, and channel performance across the full year of 2024. Overall, the business shows a strong high-ticket model with a healthy, stable gross margin, though there are clear opportunities to optimize regional investments and smooth out seasonal troughs.

High-Level KPIs

- **Total Revenue:** \$12,851,221
- **Gross Profit:** \$5,472,900
- **Gross Profit Margin:** 42.6%
- **Total Units Sold:** 52,555 units
- **Average Order Value (AOV):** \$25,702 (*indicating a highly lucrative B2B or premium transaction model*)

Core Breakdown & Performance Metrics

1. Revenue by Region (Market Contribution)

Sales are relatively well-distributed across five key regions, with **Eldoret** leading the pack.

- **Eldoret:** \$2,972,918 (23.1% share) – *Top performing region.*
- **Mombasa:** \$2,593,174 (20.2% share)
- **Nairobi:** \$2,524,081 (19.6% share)
- **Nakuru:** \$2,385,205 (18.6% share)
- **Kisumu:** \$2,375,843 (18.5% share)

2. Revenue & Margins by Product Category

While **Apparel** brings in the most top-line revenue, gross margins across all major categories remain remarkably tight and healthy, hovering between 42% and 43.7%.

- **Apparel:** \$3,039,794 revenue | 43.8% margin (*Highest revenue & highest margin*)
- **Food & Beverage:** \$2,660,903 revenue | 43.3% margin
- **Industrial Supplies:** \$2,429,233 revenue | 42.6% margin
- **FMCG:** \$2,422,754 revenue | 41.6% margin
- **Electronics:** \$2,298,537 revenue | 41.7% margin

3. Sales Channel Performance

The business utilizes a diverse multi-channel sales approach. No single channel dictates the market, but **Walk-in** trade is the narrow leader.

- **Walk-in:** \$3,430,648 (26.7% share)
- **Direct:** \$3,400,417 (26.5% share)
- **Online:** \$3,163,570 (24.6% share)
- **Distributor:** \$2,856,586 (22.2% share)

4. Monthly & Quarterly Revenue Trends

The business experiences distinct seasonality, peaking early in the year and hitting a noticeable slump in the third quarter before recovering.

- **Peak Performance: Q1 2024** was the strongest quarter, bringing in **\$3,454,251** (26.9% of the annual total), with March being the individual peak month (\$1,444,603).
- **The Trough: Q3 2024** was the weakest quarter, dropping to **\$3,013,436** (23.4% of the year), with September marking the lowest revenue month of the year (\$604,979).

Strategic Actions & Key Insights

- **Double Down on Eldoret:** Since Eldoret is the single largest revenue driver (23.1%), the company should prioritize it for stock allocation and promotional spend. A minor 10% lift here yields a far greater dollar return than a massive spike in smaller markets.
- **AOV Upselling:** An Average Order Value of \$25,702 points to large-scale transactions. Introducing volume-based pricing or specific product bundles could push the average order closer to the \$30,000 threshold, significantly moving the revenue needle.
- **Counter-Seasonal Planning:** The Q3 dip (specifically September) is a predictable bottleneck. The business should proactively plan targeted customer retention campaigns or special distributor promotions ahead of Q3 to smooth out annual cash flow.
